公司简介 COMPANY INTRODUCTION

台州劲悦缝制设备有限公司位于“中国缝纫机之都”的浙江省台州市椒江区，是觅林集团旗下专业从事服装设备功能开发和智能应用研究的企业。拥有稳定的生产基地，合作生产各类缝制机械设备。

公司品牌“劲悦”，寓意“尽享速度和力量”。公司致力于通过缝制技术智能化提升服装行业的生产效率，满足不同业主对多样化线迹的需求；通过降低能耗和噪音，节省生产成本，改善车间的生产环境；通过设备外观的创新设计，为一线工人带来愉悦的工作享受。

“劲悦”携手杭州觅林进出口公司，共同致力于国际化推广。经过15年的努力，JOCKY设备产品广泛应用于服装鞋帽，车辆内饰，皮革制品和家居纺织等行业，同时成为很多国际设备品牌的定牌生产基地和供应商，产品远销50多个国家和地区，具有较高的国际影响力。

公司致力于中国缝制技术和应用的推广和传播，通过“缝纫吧！”互联网缝制学院平台，创作和翻译大量文章，赢得世界各地读者的欢迎。

TAIZHOU JOCKY SEWING MACHINERY CO., LTD is located in Jiaojiang District, Taizhou City, Zhejiang Province, which is called the China Sewing Machine Capital. It is a subsidiary of Meetlin Group, specialized in the development of garment equipment and research of intelligent application. It has a stable production base which can produce all kinds of sewing machines and related equipment.

The brand JOCKY means-Enjoy Speed And Power-. We are committed to improving the production efficiency of the garment industry by the intelligent sewing technology to meet needs for diverse stitches; To save production cost and improve workshop environment by reducing energy consumption and noise; To bring pleasant enjoyment to the worker by innovating design of the appearance of the equipment.

JOCKY with Hangzhou Meetlin Imp.& Exp.Co.,Ltd. is committed to international promotion. After 15 years' efforts, JOCKY brand machines have been widely used in clothing, shoes, hats, vehicle interior decoration, leather products and household textile etc. Meanwhile, we have become the main supplier and OEM production base for many international famous brands. Our products have been exported to more than 50 countries, which makes us a well-known and professional equipment supplier in the world.

Our company is committed to the promotion and spread of China's sewing technology and application. Through the Sewing School-column in Sewingbar platform, you can find many articles which has attracted worldwide readers.

JK8200A-12080 全自动模版机

Automatic pattern template sewing machine (1200x800mm)

The structure of taper clamping is adopted to ensure the free clearance of the clamping plate, convenient operation, and to reduce the pressure stability of the air source. When the air pressure drops to 0.4MPa, the template still can be pressed and worked normally; The simple template design greatly reduces the cost of template production. The machine head adopts oil-free lubrication technology, and the hook adopts oil line lubrication technology. The application of the two technologies solves the problem of high speed operation of the machine, and completely eliminates the pollution of liquid lubricant to the fabric.

JK5200DDI-4 直驱电脑带刀平缝机
Computerized lockstitch sewing machine with edge cutter

Side cutters make sewing and repair tool process all at once, and improve the working efficiency. feed mechanism in a unique. Suit for sewing shirts, suits or similar clothing, especially its collar and the front parts.

JK5200

JK9988-560 长臂电脑平缝机

Long arm computerized lockstitch sewing machine (560mm)

Machine head is moulded by whole mould, no weld and change, steady and fastness, lower vibration noise. Automatic oil lubrication, no oil on front of machine head, make sure no blot on sewing material. Needle position exactly, trimming thread quickly, high speed. Big table 120x150/180cm, lifting stand, removeable pedal, can work easily when standing. Automatic thread trimmer, automatic lifting presser foot, automatic needle position. Suit for large, quilting materials and template, such as down coat, sport clothing, quilted jacket, wind coat, jacket, suit, shirt sleeping bag etc.

JK9988-802

JK777M-D4 直驱电脑带刀平缝机
Computerized lockstitch sewing machine with edge cutter

Knife holder separate, easy to control, electric thread tension, new LED with cold light, mechatronics design, intelligent system, power saving more than 70%.

This machine is a new generation of intelligent computer flat sewing machine, using touch screen, simple click input with the fingertips, sewing function can be set easily, touch screen operation settings are simple, with a large number of simple and easy to understand illustration icon, can operate intuitively. Adopt the latest electromechanical all-in-one structure, easy to operate. Use large spinning shuttle, reduce the time for changing baseline to improve work efficiency. Suit for sewing medium thickness leather clothing and other fabrics.

JK-X5 电脑单针上下送料平缝机
Computerized single needle up and bottom feed lockstitch sewing machine

Equip with big hook, automatic lubricating system, it has superior sewing capability on heavy duty and multilayer materials. Its link-feeding forward- backward mechanism minimizes stitch length errors. Suit for sewing leather, artificial leather, canvas, seat cushion, sofa, bag etc.

JK20606-2 综合送料中厚料平缝机

Double needle compound feed lockstitch sewing machine

This machine adopts one straight needle, vertical-axis rotating hook with self-lubricating feature for catching thread loops and sliding bartake-up to produce two lines of double lockstitch. The needle bar can be engaged and disengaged mechanically and the arm shaft and hook shaft are supported by ball bearings.

JK-F7-4D 超高速直驱包缝机

Direct drive 4 thread overlock sewing machine

JK747F-DD 超高速直驱包缝机

Direct drive 4 thread overlock sewing machine

It is applicable to general overlock stitching on light and medium heavy materials. The machine adopts automatic lubricating system, has great performance and runs smoothly, provides stable and beautiful seam even at high speed seaming.

Built-in direct drive motor, with needle position, adopt double straight needle and double looper to 514 stitch, with automatic compelling force lubricating device on needle bar part, not only guarantee enough lubrication of the needle bar, but also prevent oil leakage on the needle bar. Suit for thin and medium heavy fabric.

JK752-13DD 超高速直驱包缝机

Direct drive 4 thread overlock sewing machine

The machine include advanced function, such as automatic cloth edge sensor and automatic detection function, which could efficiently control the wasting of resources when sewing without cloth and racing the motor, the machine reduce garment factory much more cost and greatly enhance efficiency.

EX5214DD-EUT 超高速自动剪线包缝机

Direct drive 4 thread overlock sewing machine with auto-trimmer

EX5214DD

The machine include advanced function, such as automatic cloth edge sensor and automatic detection function, which could efficiently control the wasting of resources when sewing without cloth and racing the motor, the machine reduce garment factory much more cost and greatly enhance efficiency.

EX5114DD-EUT 超高速小嘴自动剪线包缝机

Small cylinder bed 4 thread overlock sewing machine with auto-trimmer

With top and bottom differential feeding device, the top and bottom feed dogs are independently driven, the stopper regulates the path of the top feed dog just before it contacts the bottom one, thus no wrinkle produced on the fabric during sewing with increased feeding distance, large differential feed ratios can be obtained, these features increase feeding efficiency, high quality products with no twisting or ply shifting can be achieved.

EXT5214DD 超高速直驱差动包缝机

JK8808 电脑直驱拼钮机

Computerized direct drive snap attaching machine

The maximum instant punching press of this machine can reach to 1500kgs, which makes it easy to attach 60mm metal button in high quality. Adopting direct-drive servo motor, it will only start motor at moment of punching button. Compared with traditional button machine, it can save more than 90% power.

JK818

JK808

JK-Q1 单头气动式装钮机

1 puncher pneumatic snap attaching machine

Pneumatic button attaching machine is driven by air with high efficiency, energy economy and safety environment protection. It can work normally even without power if with sufficient air pressure. The multi-headed button attaching machine could fix many button mould at one time and switch easily, so it is in favor of fixing various kinds button on one cloth at one time, adjust the reductor to change the press to avoid damage the plating on the button to keep the button firm and beautiful.

JK9820 圆头电子锁眼机

Eyelet button holing machine

The JK9820 is equipped with a liquid crystal display (LCD) and indicates display items with icons and letters, setting and check of sewing patterns and change of sewing modes are easy to understand and operate, the arm pocket of 120mm depth gives a sufficient space, enabling material setting smoothly. It is suitable for sewing vertical buttonholes and hip pocket parts. The arm shape provides a good view of the needle area, allowing workers to observe the sewing easily, the shape of the looper, the thread take-up amount and some other parts have been reviewed, skipped stitches and insufficient thread tightening due to a change of thread tension are reduced, regardless of types of threads, the range of sewing capability has been enlarged.

Sewing shape:

JK1790 平头电子锁眼机

Straight button holing machine

Adopt new-type thread trimming mechanism, it is no longer required to snip off the end of thread, the feeding and needle bar mechanisms are driven by a stepping-motor capable of analyzing as precise as 0.05mm, which ensures beautiful and quality seam, by setting the sewing speed of the first 5 stitches on the control panel, the machine starts working at low speed, which can largely prevent thread breakage and fraying at the beginning of sewing.

This sewing machine is designed for making reinforced stitching of various kinds of clothing such as suits, jeans and working clothes, and also for eye-let button hole tacking. It adopts simple V type belt moderate organization, which can increase reliability and service life of machines. The tack length can be easily adjusted with concentrated lubrication system, automatic thread trimmer and presser lifter. New design of large cam reduces the impact of the inflection. You can get a desired stitch by using different cams.

JK2153B 差动曲折缝纫机

Differential feeding zigzag sewing machine

Adopt double presser foot with upper & lower feed that make the stitching neat and beautiful, by adoption of large hook, shorten the bottom line replacement cycles, greatly improving the sewing efficiency, low noise and vibration, easy to operate, automatic high speed oil lubrication system, new designed differential structure, same hook timing of each zig-zag stitch. make the stitch more beautiful, suit for sewing thick materials, especially sports and leather products, such as bags, shoes, hat, sofa, tents.

JK1530 自动供油曲折缝纫机

Auto lubricating zigzag sewing machine

This machine adopts fork feed, hook thread take-off moving needle bar mechanism, high-precision mechanical transmission to ensure perfect seam. It can be used for straight seam, zip seam, embroidery, hemmed seam, wrapped seam, decorative seam and other seams., the machine is stable in performance and easy to operate. It is suitable for zigzag seam, abutted seam and decoration seam on light and medium-heavy materials of clothing, shoes & hats, leather products and so on.

JK652 厚料曲折缝纫机

Heavy duty zigzag sewing machine

This model adopts link take-up and vertical full-rotation large hook catch thread. Adding the winding quantity of bobbin, it can reduce time in changing base thread, improve the sewing efficiency, then ensures to sew the decoration better. When sewing the decoration, we can change the needle gauge any time according to the actual need. It is suitable for sewing the decoration of leather products, shoes, boots, handbags, bags, etc.

JK500 暗缝机

Blind stitch sewing machine with motor

For adoption of blind stitch mode, the sewn stitch is invisible from the surface of fabric, which maintain the clothes much neater and more elegant, widely used for hemming cuff, pant, shirt, glove, sock, front and back of western suit, etc. Suit various material such as cotton, wool, chemical fiber, etc.

JK600/101 工业暗缝机

Industrial blind stitch machine

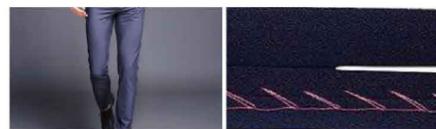

Equip with mini motor and no necessity for table and bracket; used freely if fixed on side the work plate and connected electricity, the single thread blindstitch hides itself so that we can not see it from the outside, which makes the clothes much neater and more elegant, widely suit for hemming cuff, pant, shirt, glove, sock, etc. Suit for various materials, such as cotton, wool, chemical fiber, etc.

JK860 裤耳暗缝机

Belt loop blind stitch machine

For adoption of blind stitch mode, the sewn stitch is invisible from the surface of fabric, which maintain the clothes much neater and more elegant, the auto knife are fitted for edge trimming, by putting the scrap and leftover piece in use, the fitted forward tooth ensure the feed smooth and stable even more, exclusively used to the trouser ears blind stitch, width of finished products (8/9/10/11/12mm, please indicate the width of products)

JK140 筒式暗缝机

Tubular blind stitch machine

For adoption of blind stitch mode, the sewn stitch is invisible from the surface of fabric, which maintain the clothes much neater and more elegant. The equipped adjustable rolling bracket fixes the elastic cotton fabric with different calibers, which makes it easy to be operated. Suit for socks, gloves, cuffs of sleeves, etc, such small caliber things blindstitch.

JK1430 潜水衣暗缝机

Diver suits blind stitch machine

For adoption of blind stitch mode, the sewn stitch is invisible from the surface of fabric, which maintain the clothes much neater and more elegant. The equipped adjustable rolling bracket fixes the elastic cotton fabric with different calibers, which makes it easy to be operated. Its special synchronized feeding device makes the sewing faster and more reliable. Suit for blind stitch the clothes in cotton, needle-weaving and chemical materials, especially for the rubber-like diving suits, waterproof suits and surfing suits.

JK364-QBD3 前后差动电脑暗缝机

Computerized differential feeding blind stitch machine

Widely used for hemming cuff, pant, shirt, glove, sock, front and back of western suit etc, and suit various materials, such as cotton, wool, chemical fiber etc.

JK591DE 电脑罗拉车

Computerized post bed sewing machine

Heavy duty style (all in one machine), more lower voice, more reasonable structure, best repeated needle, stronger climbing, more space to operate. Suit for arc article as top grade leather shoes, gym shoes, luggage, gloves etc.

JK9910 罗拉车

Post bed wheel feed sewing machine

It is designed with link lever thread take-up, vertical rotary hook, compound feed by driven roller presser foot, roller feed dog and needle, to produce lockstitch, it uses precise cog band for driving arm shaft and hook shaft, knob type stitch regulator and post sewing bed, with needle bearing and ball bearing used the key moving positions, the user can obtain elegant stitches, smooth and quiet running and excellent sewing performance, so it is especially available for sewing on medium heavy weight articles with small radius, such as superior leather shoes, handbags, gloves, caps, etc.

JK9910 Single neele
JK9920 Double needle

JK8365 单针超高头缝纫机

Post bed compound feed sewing machine

High-posted design (posted height 443mm), suit for stitching the large dimensional articles, such as boots, bags, suitcase etc. Unison feed assures smoothly feeding, with special designed needle plate, suit for stitching the small-curved portions, such as the bottom, gores, corners of the bags etc. Back taking only with gentle press on the back taking bar, convenient operation.

JK401 单针链式手套机

Single needle chain stitch glove sewing machine

Adopts cam take-up thread, looper hook thread, upper feeding mechanism, can do 401 double chain stitch, use column structure of curved needle, can sew small items better, good sewing stitch, no need bobbin winding.

JK335A 综合送料筒形缝纫机
Cylinder bed compound feed sewing machine

No matter the material's surface is smooth or rough, it can sew steadily, the inner layer won't move even several leathers are sewed together, by steadily hemming shoes and stitching the concave and convex corner, to save a lot of cost and time, the needle clamp with an extra setting plate to sew anything stably, several leathers are sewed together and ensure less discrepancy in stitching. Suit for hemming shoes, purse, belt for sewing bags, sofa and for shaping sport apparatus etc.

JK246 综合送料筒形缝纫机
Cylinder bed compound feed sewing machine

High precision unison feeding mechanism, can sew cylinder type material easily, new seam adjusting device with precise setting, can easily adjust the seam distance between forward sewing and back reverse stitches, can adjust presser foot from top to bottom without any other tools easily, equip with double capacity revolving hook to reduce the time to change thread and to raise sewing efficiency. Suit for caps, cushions, boots, shoes, bags, luggage, handbags, travel ware accessories etc.

JK8B 综合送料筒形缝纫机
Cylinder bed compound feed sewing machine

For darning and mending all types of medium to heavy materials, designed for stitching tubular and curved work, safety clutch prevents hook from being damaged. Suit for caps, cushions, belts, shoes, bags, luggage, handbags, travel ware accessories etc.

JK441 综合送料筒形缝纫机
Cylinder bed compound feed sewing machine

The needle feed mechanism in cooperation with the walking foot mechanism achieves powerful feeding force, to assure high quality seam without material slippages, max. presser lifting height 20mm assure smooth placement/removal of extra heavy-weight materials, mainly for sewing extra heavy weight materials such as canvas, leather, and other extra heavy weight materials. Suit for sewing auto products (air-bag, seat cushions, life belt, etc.), base ball gloves, bags, sacks, shoes, etc.

JK1341-7 综合送料筒形缝纫机
Cylinder bed compound feed sewing machine

High precision unison feeding mechanism, streamline needle plate shape is perfect for cylinder type sewing, new seam adjusting device with precise setting, which can adjust the seam distance between forward sewing and back reverse stitches easily. Suit for sewing various of cylinder-type and curved material, which includes bags, handbag, sofa, shoes, small leather products, etc.

GA5-1 筒式厚料平缝机
Cylinder bed lockstitch sewing machine

Suit for sewing canvas, leather products such as truck canopy sails, heavy-duty bags, belts, saddles, bags and other products.

JK-296 自动上胶分边锤平机

Auto-cementing separating sides and pounding machine

This machine can improve the work efficiency, reduce working procedure, and don't damage the material. Suit for integrative task of multi-working procedure of the automatic edge division cementing and pounding of joint of the material of PVC, PU leather, nature leather, synthetic leather and cloth material for shoes upper, cases, bag, cell phone bag and all kinds of leather products.

JK-298-B2 电脑上胶折边机

Auto hot-cement edge folding machine

Suit for material of PVC, PU leather, nature leather, artificial leather and cloth for shoes, leather bag, wallet and cell-phone cover which are made of leather, it can automatically gelatinize with hot-cement, folding width can be adjusted to 3-8mm, rotating button adjusts the temperature, flow quantity of the thermoement with easy regulating and accurate indicating, light sensitive resistance controls the discharge stably and accurately.

JK-A2 热风贴条机

Hot air seam sealing tape machine

Panasonic PLC control, up and low roller chain are synchronous, auto compensation and reverse, double pedals control blowing-in hot air is filtrated without any water and oil, it can work up to 24 hours, auto tape clipping, feeding and finishing reduce function. Suit for kinds of waterproof garment and products, such as waterproof jacket, raincoat, tent cover etc.

JK-U60 超声波花边机

Ultrasonic welding machine

Seamming, trimming and embossing without glue, thread or other consumables, more faster and cost effective than traditional sewing machine and adhesive ways, eliminates fraying or unraveling of bonded edges and seams, multifunctional and thousands of designs available, requires minimum training and maintenance, super strong ultrasonic power meets the needs of different fabric thickness.

JKTF-5000 高频机

High frequency welding machine

Suit for pure PVC or any containing more than 30% of PVC hard/soft rubber, leather, cloth and other special purposes can be processed, such as shoes, trademarks, album, name card album, book cover, file packet, raincoat, umbrella, rain sails, handbags, almirah, chair, chair cushion, blowing air ship, blowing gas pools, water bed, vacuum packaging etc.

SCR-1P-3G 自动充绒机

Auto weighing and velet stuffing machine

This machine is an electromechanical product with unilateral charge pile, structure is composed of touch panel and PLC control, with the filling equipment can effectively improve the productivity, reduce labor dynamic strength, improve the production environment of the factory. Suit for down clothing and other products

LCF-600 多功能商标剪折机

Full Function Lable Cutting And Folding Machine

It is featured with a compact structure and easy operation. Only need the change of the mold, the machine is able to chopper fold five types of labels. The main engine is driven by the frequency changer circuit to realize a soft start, and with the addition of a high-performance photoelectric system which allows to automatically recognize the labels and stop when there's no label or defective labels. It's also featured with characteristics of adjusting the length of the label without the use of any tool, also it can be equipped with a sensor system according to user's requirements. The main target of this system is for chopper folding the printed labels and the labels without pushing line.

CZ1-1 钻布机

Cloth drill

It is one of necessary equipment used in clothing production, it has the merit of compact size, light weight and convenient operation, suit for drilling printing mark holes onto the cotton, wool, linen, silk and chemical fabric materials

CZ1-1 Without heating
CZ1-2 With heating

T799-M1 剪线机

Thread trimmer machine

With double heads, can work at the same time, two workers can work at the same machine. It brings high efficiency, it is 3 times more than hand cutting. Widely suit for T-shirt, underwear, embroidery, socks, gloves, shirts edgings, luggage, etc.

T799-M1 Single suction motor
T799-M2 Double suction motor

JK-560A 吸线头机

Thread suck machine

The fierce air suction can remove the thread tip, dust, etc. It makes clothes brighter and attractive. It features visible object workable, extra-long air suction, easy operation and low noise. Suit for various fashions, shirts, western-style trousers, skirts etc.

JK-560A 3KW 380V
JK-560C 1.5KW 220V

JK-P3862T 气动烫画机
Pneumatic heat transfer machine

JK-F101 全自动热转印标机
Automatic heat transfer machine

JK-38 手动压画机
Handle heat transfer machine

JK-8IN1 摇头多功能八合一烫画机
Multi function heat transfer machine

JK-PHP1515 全自动转移印标机
Automatic pneumatic heat transfer machine

JK-G1520 气动烫画机
Double station pneumatic heat transfer machine

TDZ-80X120A
电加热吸风烫台
Electric heating air suction ironing table

- TP65X120
- TP65X120A with arm
- TDZ-80X120
- TDZ-80X120A with arm
- TDG-82X122B1 with 4.5KW boiler
- TDG-82X152B1 with 4.5KW boiler

TDZG-Q3
带锅炉吸风条形烫台
Air suction ironing table with boiler

- TDZ-Q2
- TDZ-Q3 with light
- TDZC-Q3 with vacuum and blowing
- TDZG-Q3 with 2.5KW boiler

JK-TLE
电脑免烫蒸烫机
Computerized non-ironing press (electric type)

JK-PF101
吹裤机
Pants finisher

JK-P950J
牛仔马骝机
Denim jeans scraping and brushing machine

JK-P955J
牛仔褶皱机
Jeans wrinkle station

DLD3-0.4-1 电加热蒸汽锅炉 (半自动)
Electric steam boiler (half automatic)

DLD3-0.4-A1 电加热蒸汽锅炉
Electric steam boiler

DLD6-0.4-A2 6KW
DLD9-0.4-A2 9KW
DLD12-0.4-A2 12KW

DLD6-0.4-A2 电加热蒸汽锅炉
Electric steam boiler

DLD24-0.4-A2 电加热蒸汽锅炉
Electric steam boiler

SZS0.015-0.4-Q 全自动燃气锅炉
Fully automatic gas-fired steam boiler

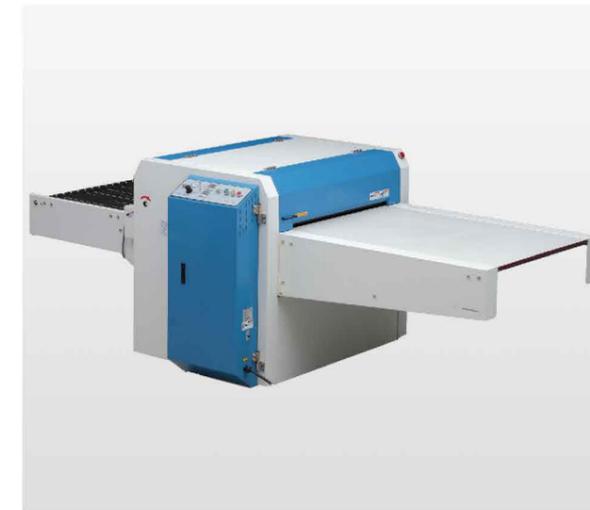

JK-9000 小型电加热蒸汽锅炉带熨斗
Electric steam boiler with iron

JK-88A-D 智能蒸汽锅炉带电熨斗
Smart steam boiler with electric steam iron

JK-01A 智能蒸汽锅炉带全蒸汽熨斗
Smart steam boiler with full steam iron

JK-900LFS 立式粘合机
Straight liner fusing machine

JK-450MS 粘合机
Fusing machine with stand
